# Dániel Péger

## Product Designer & Developer

I'm a generalist, driven by the vision of tech enhancing human lives. I love building useful and fun things, explaining ideas, making sense of complexity.

## EXPERIENCE

### Product Designer, Cactus Communications

Remote, 2021-2023

At Cactus I worked on Paperpal, a machine learning based writing assistant for academic authors. As the only designer on the team I lead a redesign project that resulted in doubling our adoption rate and nearly doubling our revenue.

### Product Designer, G/O Media

Budapest, 2018-2021

G/O Media is a family of blogs with 100+ million visitors per month. As a member of the G/O design team I took part in redesigning site navigations, building modular homepages and creating new story formats.  I led efforts around our design system, accessibility and internal tooling.

### UX Designer, Index.hu

Budapest, 2016-2018

Doing research, interface design, illustrations and motion graphics for the highest-traffic online news publisher in Hungary. Projects I contributed to include: improving sport coverage interfaces, redesigning an internal sales campaign manager tool, and creating a new visual identity with reusable motion graphics templates for the video team.

### Junior Frontend Developer, Battlejungle

Budapest, 2015-2016

My first full-time job was at a fast-growing software startup. I was mainly responsible for frontend code, but the team's small size meant I could participate in all areas of work including sales, marketing and business development.

## EDUCATION

### Business Information Systems BSc, Corvinus University of Budapest

Budapest, 2012-2016

Completed courses include Software Technology, Database Systems, Web Development, IT Service Management, IT Audit, Management Control and Business Economics. Thesis on UI design of enterprise software.

### University College Dublin

Dublin, 2014

Semester abroad.
